

7/30/98

# STRINGS CLASS REFLECTION 9/30/98

(guest conductor David Barg)

Name

Adam Blank

1. Discuss one musical problem that Mr. Barg helped you solve.

He helped me learn how to stay with a conductor. I learned hand signals can represent a lot & that if we use them we follow them more because we have to figure out the sign

2. How can you use this information to solve other problems?

I can use this unique situation to help me in future careers. Say I was a doctor & it was really hard to pick of what there saying because its to loud. If I'm lead a business meeting I can use different hand signs to get my message across

3. Describe in detail something Mr. Barg said that made a difference in your playing (or thinking).

"Repetition is the mother of Learning!" That made a difference in my school work & playing. Expressing that sentence in words is hard. Now I'm going to apply that in all I'll practice a measure at a time until I get it right

4. If you could be a conductor, what skills would you need to have to be successful?

I would need to  
could tell people

I can use this unique situation to help me in future careers. Say I was leading a business meeting - I could use different hand signals to get my message across.

Repetition is the mother of learning! That made a difference in my school-work and playing. Now, I'm starting to apply that in all activities.

5. What did you enjoy the most about

I liked having two teachers because one can go around & one could teach. It seems like more than 1 teaching.
